## DETAILED ACTION

### *Election/Restrictions*

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to a process for reeling a pulp sheet, classified in class 162, subclass 118.
  - II. Claims 2-10, drawn to an apparatus for reeling a pulp sheet, classified in class 162, subclass 283.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used to practice another and materially different process, for example, reeling of tobacco sheets.
